

# Program

for

Euromeet Norway 2010

13<sup>th</sup> - 15<sup>th</sup> of August 2010

## Friday 13th of August:

The meeting responsible will be present the whole day to welcome the participants as they arrive. We will start the barbeque at 16:00 o'clock and it will be kept warm during the evening as long as needed.

## Saturday 14th of August:

**11:00 o'clock:** The cruising is starting. We drive together from the camping ground to down town Bø, then we go to a nice regional museum where you can get a chance to see how people were living in Telemark in the old days. We advise you to bring your camera. If this is not of interest, you may also go your own way and can then joint the rest of the crowd at the place of the car exhibition. Representatives from RACN will be present at this place from 12:00 o'clock.

**13:00 o'clock:** Time for the motor show - car exhibition - concourse d'elegance. We will be lining up in front of the city hall of Bø. During this arrangement we will also be selling tickets for the lottery, club effects, coffee etc. Also it would be very nice and appreciated if some of the participants had parts for sale, so we could make a swap meet.

**16:00 o'clock:** Trophies are awarded for the best cars and we draw the winning tickets of the lottery. We are still in front of the city hall.

**18:00 o'clock:** The barbeque is started up.

**19:00 o'clock:** We are all together for barbeque, party and fun.

## Sunday 15th of August:

Resting, having breakfast, spend a bit more time together before going home. Take care and drive safely, see you next year.

**12:00 o'clock:** RACN is arranging a general meeting for the members with presentation of the activities since the last general meeting, financial reports and approval of the current board of directors or election of a new board.

During the whole weekend, it will be possible to participate in a quiz that will take place at the camping ground. The answers must be handed in before leaving the place. The results will be published in the September issue of Ramcard.
